(54) Abstract Title
Medicated/scented feet wipes

(57) Medicated/scented feet wipes impregnated with essential oils are provided for use as a general hygiene accessory and in reflexology and aromatherapy.

The claims were filed later than the filing date within the period prescribed by Rule 25(1) of the Patents Rules 1995

This print takes account of replacement documents submitted after the date of filing to enable the application to comply with the formal requirements of the Patents Rules 1995

Medicated/Scented Feet Wipes

Description

Field: To use especially in Reflexology practice but also in general, wide public usage.

Background

The Feet Wipes as specific products are currently non-existent, and as such unavailable. Clearly a commercial gap for a product of this kind does exist.

Technical Features

A) The Feet Wipes would be new in terms of their a) size, b) labling/purpose and c) impregnated scents.

B) They would be so packaged a) individually or b) flat, boxed in square or cylinder-type containers.

C) The particular novelty of the Feet Wipes would be their aromatherapeutic properties. They would be therefore impregnated with the Essential Oils of:

a) cypress, b) juniper, c) myrth, d) mint e) tea-trea, and even f) camomile and g) elderflower, although there could be plain, medicated i.e. unscented version too.

It is imagined that manufacturing the Feet Wipes should not require a complicated technological procedure, nonetheless.

CLAIMS

1. The Medicated/Scented FEET WIPES for the use as a specific tool in Reflexology practice or in general public usage.
2. The particular sizes, thicknesses, manner of packaging or the kind of impregnation with the Essential Oil as a matter of choice or to be negotiated with a manufacturer.
